**DETAILED ACTION**

***Claim Objections***

1. Claim 28 is objected to because of the following informalities: In line 3, "the full width" should read --full width--. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Saylor, Jr.

Saylor discloses an apparatus for providing decaling liquid to a metal strip comprising: a first array of nozzles normally positioned to spray full width of passing metal strip (figure 1), a second array of nozzles normally in a position remote from the passing metal (figure 4). Saylor fails to disclose a second array of nozzles in a maintenance position. It would have been obvious to one having ordinary skill in the art to utilize the raised inoperative position (figure 4) as suggested by Saylor for servicing and maintenance the array of nozzles. Doing so would lessen equipment downtime due to servicing and repairing.

***Allowable Subject Matter***

4. Claims 1-27 are allowed.

***Conclusion***

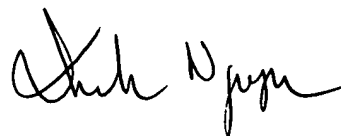

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6,385,832 to Grafe et al. discloses a device for descaling of metal strips.
